Your vehicle has failed the emissions (I/M) portion of your annual safety inspection. The rating your vehicle received indicates that the emissions related components are operating at highest efficiency and repairs are needed. A qualified vehicle service technician can perform the appropriate diagnostic tests to determine what repairs may be necessary.

The testing inspector should provide you with a list of Recognized Emissions Repair Facilities and a fact sheet of additional information on what you should do next. Vehicles that fail the test must be repaired before an inspection sticker can be issued. Some newer vehicles that fail the I/M test may be covered by manufacturer's warranties. Consult your owner's manual or your dealer for details.

The fact sheet you receive also includes information on various waivers available, retest details and referee services. Feel free to go over this information with your testing inspector. This information is also available in more detail on the Department of Public Safety's Website at www.airchecktexas.com. If you have any additional question regarding the I/M test, call your local Department of Public Safety Motor Vehicle Inspection Waiver Office.

If defects indicated above are corrected and the vehicle is returned to the original inspection station within 15 days, (excluding the date of rejection) the vehicle will be reinspected once with no additional fee. THIS IS NOT A PERMIT TO DRIVE A DEFECTIVE VEHICLE OR TO DRIVE A VEHICLE WITHOUT A CURRENT VAL INSPECTION CERTIFICATE.

I certify that I have properly performed the emissions test according to state regulations and procedure manuals and have provided additional information to the customer regarding repairs, retest and waivers.
